

DURA-lite™ Glass-Backed Natural Stone

Granite

Using state of the art manufacturing processes, DURA-Lite™ translucent glass-backed natural stone panels are a natural stone veneer laminated to a glass substrate, allowing light transmission. Extracted directly from stone quarries, the stone is custom chosen for each project.

Alabaster

Custom choices of endless varieties of stone

Precise bookmatching

Custom made to size

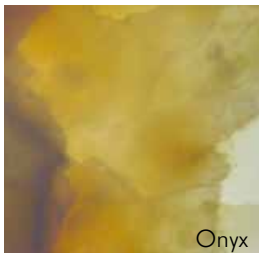

Knife miter or quirk miter corners

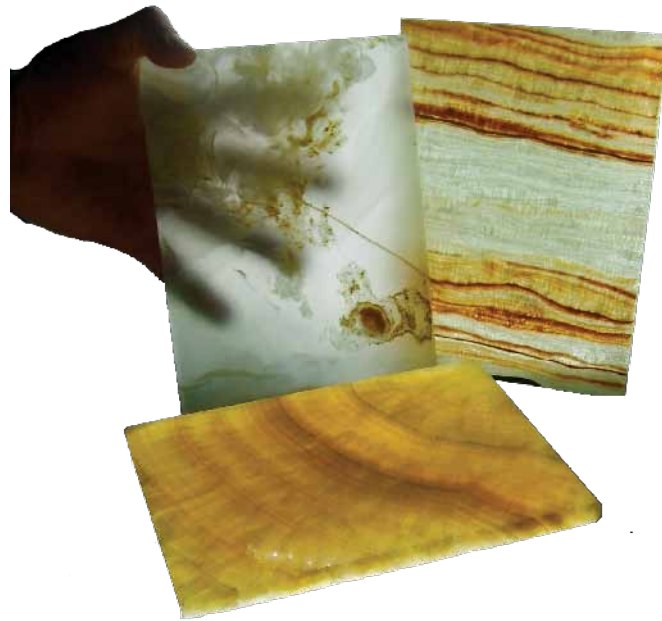

Travertine

Marble

Onyx

DURA-lite™ Glass-Backed Natural Stone

thin: transmit light

- 100% Natural stone – onyx, alabaster, quartz, marble, granite
- Laminated with permanent bond between stone and glass/acrylic backing
- Overall thicknesses ranges from 5mm to 2 inches
- Stone layer as thin as 1 mm
- Thin stone allows for more translucency
- Minimizes hot & cold spots
- Knife miter or quirk miter corners

large panels: minimize seams

- Large panel sizes up to 48" x 102"
- Cleaner finished look
- Less seams / grout lines
- Less structural elements needed
- Eliminate shadow lines
- Better book-matched panels

lightweight: reduce structure and install

- 1/3rd the weight of dimensional stone
- 3 times as strong as same thickness dimensional stone
- Less structural elements needed
- Less weight = less costly shipping
- Less weight = less costly installations
- Faster installation times
